

# Chapter 7.1 Case Validation: Selection Options

## Getting started:

1. Open the MPOG Application Suite.

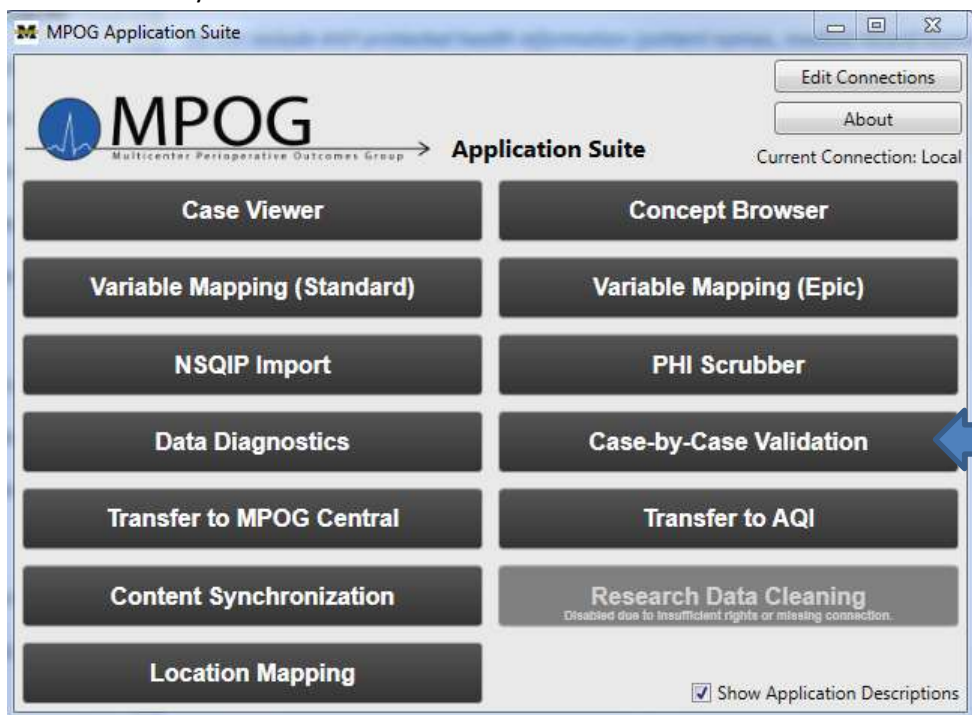

(For instructions on how to download, see 'Chapter 1: Downloading and Accessing the MPOG Suite.')

**\* Note:** Check here to verify you are on the local connection.

(If not, click on "Edit Connections" and select the 'local' option under Selected Profile. Click the 'Apply and Restart' button to continue.)

2. Click on 'Case-by-Case Validation.'

3. The screen should look like this:

Overall Progress	
2016-03	0 / 20
2016-02	20 / 20
2016-01	21 / 20
2015-12	20 / 20
2015-11	20 / 20
2015-10	20 / 20
2015-09	20 / 20
2015-08	20 / 20
2015-07	20 / 20
2015-06	20 / 20
2015-05	20 / 20
2015-04	20 / 20
2015-03	20 / 20
2015-02	20 / 20
2015-01	20 / 20
2014-12	0 / 20

The right side of this image shows the overall progress of your reviewing per date.

Green indicates that at least 20 cases per month have been reviewed.

The left side of this image displays 4 options for how you can select and open a case.

4. There are 4 options to select from. This section will explain how to use each option.
- Pick case by MRN and date
  - Pick case by case ID
  - Pick random unreviewed case
  - Pick already reviewed case

For the purpose of the monthly required case validation, it is suggested that you review and validate a good sample of cases per service. For example, if your institution has cardiac surgery, orthopedics surgery, OB GYN surgery, vascular surgery, and transplant surgery, then you should review a case for every service. It is also a good idea to validate an emergent case. After a few months, you may see trends in issues with mapping. Based upon initial review, you with help from the ASPIRE QI Coordinator and the site QI Champion will decide how to select future cases for review. For example, you might find that there is a trend of issues with mapping in the cardiac cases, so you will want to place emphasis on reviewing cardiac cases for a few months or as needed.

- Funded sites: MPOG requires review of 20 cases per month for at least 6 months prior to MPOG Central. All historical data should be validated with a minimum of 5 case validations completed per month.
- Non-funded sites: MPOG requires review of 5 cases per month for 6 months before initial upload. All historical data should be validated with a minimum of 5 case validations completed per month but can be completed after initial upload if Data Diagnostics are accurate throughout.

### Case Selection Options:

A. Pick case by MRN and date:

- i. Click the dial next to “Pick case by MRN and date.”

Use the following options to pick a case to review

☒ Pick case by MRN and date

Patient MRN

Date of Operation

☐ Pick case by case ID

MPOG Case ID

☐ Pick random unreviewed case

Time Period

Service Type

☐ Pick already reviewed case

Reviewed Cases

Overall Progress

	0 / 20
2015-04	20 / 20
2015-03	21 / 20
2015-02	20 / 20
2015-01	20 / 20
2014-12	0 / 20

b. Type in the MRN and Date of Operation for the case you would like to review. Both fields are required for this type of case selection method.

c. Click "Review Case."

- ii. The Case Validation screen should pop up. For the purpose of this training, all PHI has been removed. You would typically verify that the patient MRN & Date of Operation are the same as the case you were initially trying to select and then begin case validation. Refer to Section 7.2 for how to conduct the case validation process.

- iii. Select "Review Case" at the bottom of the screen.

The screenshot shows a software window titled "Pick a case for review". It contains several sections for selecting a case:

- Pick case by MRN and date:** Includes fields for "Patient MRN" and "Date of Operation" (set to 3/29/2016).
- Pick case by case ID:** Includes a field for "MPOG Case ID" with a long alphanumeric string.
- Pick random unreviewed case:** Includes dropdowns for "Time Period" and "Service Type" (set to (Any)).
- Pick already reviewed case:** Includes a dropdown for "Reviewed Cases" with the text "06/08/2012 HYSTEROSCOPY".

At the bottom of the window is a button labeled "Review Case", which is highlighted by a red arrow. To the right of the selection options is a table titled "Overall Progress" showing a list of dates and their corresponding review counts.

Overall Progress	
2016-03	0 / 20
2016-02	20 / 20

9. After selecting 'Review case', information from an actual case (including PHI) will open. For the purpose of this training exercise, the PHI was removed.

10. On this screen, you must answer every question with 'yes' or 'no'. You may comment as needed. Please follow-up on comments requiring action. For issues that need follow-up from the site technical team or coordinating center, the 'Save as Image' button is now available to save a screenshot of the case. **PHI will automatically be eliminated from the screenshot.**

11. A window will display asking you to save the image. The MPOG Case ID will automatically populate the File Name. Choose a file location where you will be able to access again. Click 'Save.'

12. You can now email and attach the saved screenshot to communicate any issues to the site technical team or member of the ASPIRE coordinating center.

13. As you answer each question, you may need 3-4 programs open at a time to verify the information in the MPOG case validator “matches” the information present in the hospital Anesthesia Information Management System (AIMS). For this reason, it is recommended that you have 2-3 monitor screens available for use. Most likely, you will need the intra-op record open on one screen and the MPOG case validator on the other. However, the source of truth varies per institution depending on the electronic documentation system.

\*\*For example: At the University of Michigan Health System, multiple systems are used for case validation:

- i. Centricity contains the Intra-op record, Anesthesia H&P, Case details.
- ii. Michart/Optime: May assist in validating current medications, inpatient/outpatient status.
- iii. Careweb: Surgeon documentation.
- iv. Carelink: (for cases pre-dating MiChart)

14. It may be useful to open the Case Viewer within the MPOG Suite to assist in the case review. To access from the Case Validation Utility screen, click on the ‘Open Case in MPOG Case Viewer’ tab at the top right hand of the screen. For further details on the Case Viewer, refer to Chapter 3 of the ACQR User Manual.

The screenshot shows the 'MPOG Case Validation Utility' interface. At the top, there's a 'Case Lookup Information' section with fields for Patient ID#, Date of Operation, and MPOG Case ID#. Below this is a 'Questions for Validation' section with a table of questions and checkboxes. The 'Open Case in MPOG Case Viewer' button is located in the top right corner of the main content area, circled in blue, with an orange arrow pointing to it.

15. If a case is missing information in the MPOG database for any reason, the case validator will highlight the row for that question in red and will not gray out the yes/no checkboxes. If multiple cases seem to be missing the same type of data, note the MPOG case IDs. This can indicate an extract issue or a documentation issue- discuss with the ASPIRE QI Coordinator to identify next steps. See example below.

The screenshot shows the 'MPOG Case Validation Utility' interface with a table of questions. The 'Prep' section is highlighted in red, indicating missing information. The table has columns for the question, 'Yes', and 'No' checkboxes. The 'Prep' section includes questions about preoperative weight, height, and ASA physical status.

Question	Yes	No
Did the patient have an invasive arterial line in place?	<input type="checkbox"/>	<input type="checkbox"/>
Was the highest value for a non-invasive blood pressure (systolic) BP?	<input type="checkbox"/>	<input type="checkbox"/>
Was the lowest value for a non-invasive blood pressure (systolic) SBP?	<input type="checkbox"/>	<input type="checkbox"/>
Did the patient receive all of following volatile gases: Isulfurane Sevoflurane	<input type="checkbox"/>	<input type="checkbox"/>
Was the patient's preoperative weight NOT POUND (rounded to the nearest kg)?	<input type="checkbox"/>	<input type="checkbox"/>
Was the patient's preoperative height NOT POUND (rounded to the nearest cm)?	<input type="checkbox"/>	<input type="checkbox"/>
Was the ASA physical status of the patient: ASA 4?	<input type="checkbox"/>	<input type="checkbox"/>
Was the patient's preoperative baseline blood pressure TL / SD?	<input type="checkbox"/>	<input type="checkbox"/>
Was the patient on all of following medications (and only these) prior to the case:	<input type="checkbox"/>	<input type="checkbox"/>

16. After all questions are answered for the selected case, click the 'Save Answers' button in the bottom right corner of the screen. Once the case has been submitted, there is no way to go back to review the form at this time. Also, once the case is open, you must complete it as the information will not be saved if the case is closed before submitting.

The screenshot shows a medical case review form with various questions and checkboxes. A large blue arrow points from the top left towards the bottom right corner, where the 'Save Answers' button is located. The form includes sections for 'Medications', 'Anesthesia', and 'Physiology'.

17. This will automatically save and update the monthly count for cases reviewed in the 'Overall Progress' section as seen below.

The screenshot shows the 'Overall Progress' section of the software. It includes a table with monthly case counts and a sidebar with options to pick a case for review.

Month	Count
2016-03	0 / 20
2016-02	20 / 20
2016-01	21 / 20
2015-12	20 / 20
2015-11	20 / 20
2015-10	20 / 20
2015-09	20 / 20
2015-08	20 / 20

18. An ASPIRE QI Coordinator will be available either on site or via web conference for the first pass of the case validator utility.
